

Fold & Unfold iCap

(EN)

Open zip
before folding

Open &
FOLD to
a FLAT pile

UNFOLD:
The same
steps
backwards

Two Options to take away:

1) FOLD flat

This is the regular take away state :
Faster, easier &
avoids crincls.
Fixate with HookLoop Belt.

2) TWIST
xsmall

Optionally, you can further
minimize iCap by twisting .
Fixate with HookLoop Belt
and pack it in its bag.

At the rear page:
See how to twist
your iCap

Beware computer of OVERHEATING!

Open FLAPS and FRONT COVER to VENTILATE !!

24 months warranty

iCap products are designed and built to be free of manufacturer and material defects and carry a limited 24 months warranty.

The warranty applies only when the products have been put to the use intended and it does not cover bended wires and broken connectors, due to inappropriate folding. In general, it does not cover accidental damage, misuse, improper care or alteration.

Over and above the warranty terms we are truly committed to your satisfaction with our products and service. if at any time you are not satisfied please contact us.

iCap™

Grab the FLAT FOLDED iCap at the FINGER Markings

PRESS &
then
TWIST

press
only
until your hands get
very closed to
each other

then
twist

TWIST 180° .
(A full opposite Rotation)
Please ensure that all 4 Layers get twisted !

3 loops will be formed:

The middle loop (3) must get embedded
between the outer loops (1 and 2).
Steer it (3) with your fingers and
the palm of your hand
so that it clearly goes INSIDE them (1 and 2).

Before twisting please
look at the VIDEOS →

Twisting is simple but must be done properly, otherwise the wires could get bent (normally this is not a problem, you can easily rebend them). If you have questions contact us and we will quickly give you help.
